Profile

I am a Front-end Web Developer based out of Montreal. I am independently motivated, and committed to being an effective team member with the initiative to succeed in any environment.

Experience

Front end developer, 4th whale marketing; Montreal, QC. July 2020-Current

In this role I led the front end development of the main revenue generating site for 4th whale marketing. It is a high traffic streaming site, which uses a traditional PHP LAMP stack approach. This project makes heavy use of symfony and twig template engine.

Web Developer, Jonar; Montreal, QC. March 2019-July 2020

Upon moving to Montreal I took a job with Jonar, a small software company specializing in ERP software. In this role I designed and built a new Wordpress blog for the company, and spearheaded the launch of a product website built using Gatsby/ReactJS (www.paragon-erp.com). Following this I spent several months in a full-stack developer role working on the companies flagship product, ParagonERP.

Owner/Design Lead, Freedom Gopher Web Development; Saskatoon, SK. July 2017-March 2019

Shortly after obtaining a Computer Science degree from the University of Saskatchewan, I started a small company doing freelance web design/development work. Most of these projects were focused on improving or establishing an online presence for small and medium sized companies.

Education

University of Saskatchewan; Saskatoon SK – B.A. Hon Philosophy, 2016, B.Sc. Computer Science, 2017.

Development Skills

Significant experience with HTML/CSS/JS, React, Bootstrap (and several other CSS libraries), Sass, Twig and jQuery. Experienced with Git, Github/Gitlab, Jira, and agile development processes. Full stack knowledge, especially using Node.js. Some experience building and using REST and GraphQL APIs.

Design Skills

Proficient in WordPress (and several other CMS's), experience in UI/UX design, Figma, Photoshop, Premier, After Effects, InDesign.
